

## PRODUCT SUBMITTAL DATA

# ENGRAVED ALUMINUM NAMEPLATES

**DESCRIPTION:** Anodized Aluminum Nameplates come in a variety of colors to meet any need. Color is actually part of the Anodic layer of the aluminum so it will not scratch or rust, engraved to your specifications.

**USE:** To identify commercial & industrial equipment, electrical controls, etc.

Craftmark .032" Anodized Aluminum is excellent for permanent identification needs in commercial and industrial location. Variable information is engraved deeply through the colored Anodic layer of the aluminum exposing a contrasting silver core. Available with holes or adhesive backing.
