FIBER OPTIC CABLE MARKERS

ABOUT Utilitycablemarker.com

Thanks for your business. For over 50 years Utilitycablemarker.com has been providing durable printed products to companies The World Over...

- Products to Meet ASME, CGA, IAR, OSHA AS1345, BS1710:1984, IMO, SOLAS & ISO
- Thousands of Items to Choose From
- In stock Items Ready to Ship
- Trained -inhouse customer support
- Custom Products
- Emergency Service
- Quality, Tested Products

Product Development & Testing

Unlike most catalog companies, Utilitycablemarker.com manufactures what it sells. From development through testing and production, Utilitycablemarker.com assures that we sell only the most durable, highest quality products available.

Utilitycablemarker.com test its products with UV/Condensation accelerated weatherometer test equipment in our inhouse research and development center. You can rely on Utilitycablemarker.com quality products to be fully tested to withstand UV & weather elements for your outdoor identification needs.

In-Stock Inventory for Quick Delivery

Utilitycablemarker.com stocks thousands of products in our vast warehouse and are available for immediate delivery. Utilitycablemarker.com is known for its envy of the industry deliveries on non-stock and custom items.

Products That Ship When You Need Them!

It is no secret to us that pipe identification is many times forgotten and needed just as fast as you can get them. From it's inception, Utilitycablemarker.com has delivered pipe identification products When You Need Them! If you're feeling like just another number with those other old companies then Utilitycablemarker.com is the company for you.

Customer Service

Reliable, knowledgeable customer service personnel are a key ingredient to the Utilitycablemarker.com success story. Our customer service personnel are waiting for your call whether you're requesting tech data, submittals, a quote request or placing an order.

SPECMARK FIBER OPTIC SNAP ON MARKER

Specmark Snap On Fiber Optic Cable markers is the solution to cable identification projects. These markers simply “snap on” the cable and stay there for the life of the marker! Your information is printed repeatedly in 360 degree fashion around the marker so that is visible from all direction. Bright UV inhibited colors can be printed in solids, checks, stripes-you name it! You will be able to identify your lines with ease AND keep others from mistakenly disturbing your cable instead of theirs.

Precoiled Plastic Cable Markers. Custom printed per your specifications!

STANDARD COLORS

ULTRA-SNAP

EXTENDED LIFE SNAP ON MARKER

Ultra Snap snap on Fiber Optic Cable markers is the solution to longer term cable identification projects. These markers simply “snap on” the cable and stay there for the life of the marker! The Ultra Snap has a crystal clear UV over-lamination that sheds harmful UV rays for years as well as providing abrasion resistance to your markers. Your information is printed repeatedly in 360 degree fashion around the marker so that is visible from all directions. Bright UV inhibited colors can be printed in solids, checks, stripes-you name it! You will be able to identify your lines with ease AND keep others from mistakenly disturbing your cable instead of theirs.

- The Ultra-Snap is the ultimate snap on coiled pipemarker!
- The ultimate in outdoor durability. The Ultra-Snap has a crystal clear UV resistant over-laminant that provides both UV resistance along with tough abrasion resistance.
- Markers snap on the cable and holds it tight coil for the life of the marker.
- Brilliant UV stable colors* and material for easy aerial identification and years of fade free outdoor performance.
- 360 degree visibility.
- Installation is extremely user friendly as they require;

SPECMARK-R

REFLECTIVE SNAP ON MARKER

SPECMARK-R is a premium version of the Specmark Snap On that features reflective backgrounds that light up at night—just like traffic signs. Your cables and lines can be found easily with a flashlight in the evening hours during emergencies. Sturdy UV resistant inks and a tough crystal clear UV over lamination will keep these markers looking bright for years. Lamination also helps with abrasion resistance.
